

Ready for winter utility bills?

Get up to 100% off a Home Energy Analysis & up to \$6,000 back for Whole House Upgrades

Energy Upgrade California™ is your path to greater efficiency and comfort

Energy Upgrade California is a new one-stop-shop where homeowners can find everything they need to reduce energy use and improve home comfort. The program connects you with qualified energy professionals who can plan and complete your energy upgrade project — and get you rebates, incentives and financing to help pay for it.

Take a “Whole House” Approach The sum is greater than its parts

Through this program, you can address your energy savings needs by taking a “whole building” approach that uses a Home Energy Analysis to identify energy/water waste (air leaks, poor insulation, leaky ducts, inefficient heating/cooling systems and hot water heaters) and help you plan your upgrade. Energy Upgrade California connects you to the experts and resources you need for a successful “whole-house” energy upgrade.

Get Your REBATE!

With thousands of dollars in rebates and incentives available, it's the right time to plan your home upgrade.

The Benefits:

- Increase energy and water efficiency
- Create a more comfortable home
- Potentially lower your utility bills
- Improve indoor air quality
- Reduce impact on the environment
- Support your local economy
